

SESVANDERHAVE

sugarbeet seed

2023 SEED VARIETIES

FOR AMERICAN CRYSTAL SUGAR COMPANY

www.sesvanderhave.com/US

SV203

- » Outstanding Rev/Acre Provided by High Yields and Above Average Rec/Ton
- » Low Sugar Loss to Molasses
- » Strong Aph and Rhizoc Tolerance

SV285

- » High Sugar Type
- » Best Disease Package in the Line Up
- » Adapts Well to Many Soil Types
- » Very Good CLS Tolerance

SV265

- » High Yield with Good Rec/Ton Producing Outstanding Rev/Acre
- » Excellent CLS Scores
- » Excellent Rhizoc Tolerance
- » Very Strong Vigor and Emergence

SUPERIOR VISION™

SESVanderHave Sugarbeet Seed (SV) is the leader in bringing new and innovative technologies to sugarbeet seed treatment. SV was the first to implement a multiple mode of action approach in seed treatment, providing a solid defense for sugarbeet seedlings against Rhizotonia, Aphanomyces and other early season soil borne diseases. SV continues to demonstrate Superior Vision in the implementation of new seed treatment options, as they are proven to be effective and fully approved for use on sugarbeets.

FUNGICIDE PACK

Multiple modes of action and both contact & systemic control for maximum protection against Rhizoctonia and other soil-borne diseases. This pack is standard on all SV varieties.

- Add NipsIt INSIDE for early season insect control.

TANDEM TECHNOLOGY & ROOT APHID

Tandem Technology® is bred into all SV varieties for maximum Rhizomania protection for clean roots, and less Tare.

- All SV varieties contain the Root Aphid gene.

INTEGO SOLO

A premier seed treatment for very good control of seedling Aph. Recommended rates will not cause reduction in seedling growth or vigor.

EXCEPTIONAL SUGAR PURITY

SV varieties consistently have the highest sugar purity of all varieties tested.
